VOLUME CONTENTS

Volume 10 Number 1

H. Brenner and R. F. Probstein	1	Editorial
J. D. Sherwood	3	The force on a sphere pulled away from a permeable half-space
D. Hatziavramidis	13	A theory for predicting the apparent transport coefficients of dispersions
O. J. Ilegbusi, J. Szekely and R. A. Cartwright	33	Some asymptotic and computed results on magnetically damped Czochralski crystal growing systems
P.T.Tsilingiris	53	A method for prediction of instability in double diffusive systems—development and laboratory testing of a prototype scanner for use with solar ponds
J. C. Morales, A. Campo and U. Lacoa	65	Calculation of turbulent forced convection in the thermal entry region of pipes by the method of lines and control volumes
A. L. Zydney and C. K. Colton	77	Augmented solute transport in the shear flow of a concentrated suspension
T. G. M. van de Ven	97	Streamlines around a charged sphere in shear flow
L. N. Hjellming and J. S. Walker	107	Isothermal motion in a liquid-encapsulated Czochralski crystal puller with an axial magnetic field

Volume 10 Number 2

Brian Spalding	133	Contribution to Pergamon 40th Anniversary Festschrift
Y. Hagiwara	135	Experimental studies on chaotic behaviour of liquid film flow in annular two-phase flows
P. Gillon, P. Courville, A. Steinchen-Sanfeld, G. Bertrand and M. Lallemant	149	Free convection and boundary layer instabilities in evaporating liquids under low pressure and/or microwave irradiation
J. F. Thovert and P. M. Adler	165	Transport processes in fractals—VIII. Permeability of Leibniz packings. Experimental
N. Agrait and A. Castellanos	181	Linear instability analysis for the superposition of weak unipolar injection and cylindrical Couette flow

C. Beckermann and R. Viskanta — 195 — Double-diffusive convection during dendritic solidification of a binary mixture

M. Shapiro and A. L. Shalom — 215 — Particle build-up on a single rod in magnetic capture from axisymmetric flows

S. Varennes and T. G. M. van de Ven — 229 — Effects of neutral polymers on the kinetics of particle deposition

V. Vitagliano, C. Dellavolpe, L. Ambrosone and L. Costantino — 239 — Diffusion and "double diffusive convection" in isothermal ternary systems

P. Cerisier and J. Pantaloni — 249 — Surface deformation and temperature related to defects in hexagonal convective structures

Announcement — 261 — Heat transfer in electronic and microelectronic equipment

Volume 10 Number 3

J. Metzger and D. Schwabe — 263 — Coupled buoyant and thermocapillary convection

J. R. Philip — 283 — Free convection in porous cavities near the temperature of maximum density

B. H. Brumley and G. H. Jirka — 295 — Air–water transfer of slightly soluble gases: turbulence, interfacial processes and conceptual models

J. Leblond, M. Roulleau and L. Kazan — 321 — Model for inception of boiling in superheated flowing liquid

P. Cerisier, J. Pantaloni and C. Perèz-Garcia — 341 — Thermal technique to induce a preferred initial pattern in Bénard–Marangoni convection

A. T. Richardson — 355 — A hydraulic model of electrothermal convection in a plane layer of dielectric liquid

B. R. Circelli and J. B. McLaughlin — 369 — Spatial coherence in the viscous wall region

B. Cichocki, B. U. Felderhof and R. Schmitz — 383 — Hydrodynamic interactions between two spherical particles

Volume 10 Number 4

W. F. Schierholz, P. O. Brunn and F. Durst — 405 — The time dependent behaviour of macromolecules in the flow through a sudden planar contraction

S. Varennes and T. G. M. van de Ven — 415 — Effects of polymers on the detachment of polymer coated latex particles from glass surfaces

J. R. Philip — 429 — Free convection in elliptical cavities near the temperature of maximum density

K.-H. Lie, J. S. Walker and D. N. Riahi — 441 — Centrifugal pumping in the float zone growth of silicon crystals with an axial magnetic field

D. J. Jeffrey and R. M. Corless — 461 — Forces and stresslets for the axisymmetric motion of nearly touching unequal spheres

M. Shapiro, A. Oron and C. Gutfinger — 471 — A dispersion model for electrostatic precipitation of particles from turbulent flows

H. A. Dijkstra — 493 — Transient Marangoni convection in a square container

S. R. Eisenberg and A. J. Grodzinsky — 517 — Electrokinetic micromodel of extracellular matrix and other polyelectrolyte networks

Volume 10 Number 5/6

SPECIAL ISSUE

BENJAMIN GREGORY LEVICH MEMORIAL ISSUE

R. F. Probstein and H. Brenner — 541 — Foreword: Benjamin Gregory Levich

J. C. Baygents and D. A. Saville — 543 — The migration of charged drops and bubbles in electrolyte gradients: diffusiophoresis

A. Chai, S. Hassid, E. Kit and A. Tsinober — 561 — A study of a two-layer stratified flow in an annulus: experiment and model

E. Y. Chang and A. Acrivos — 579 — The effective permeability of a random dispersion of spheres

D. S. Finnicum and T. J. Hanratty — 585 — Influence of imposed flow oscillations on turbulence

He Ding Jiang, S. Ostrach and Y. Kamotani — 599 — Thermosolutal convection flow regimes with opposed buoyancy forces in shallow enclosures

E. Kit, E. Levich, L. Shtilman and A. Tsinober — 615 — Coherence and symmetry breaking in turbulence: theory and experiment

Liu Jun and D. B. Spalding — 625 — Numerical simulation of flows with moving interfaces

M. D. Pandian and S. K. Friedlander — 639 — Particle deposition to smooth and rough walls of stirred chambers: mechanisms and engineering correlations

J. R. A. Pearson and J. D. Sherwood — 647 — Continuum modelling of cross-flow filtration

D. E. Rosner — 663 — Experimental and theoretical research on the deposition dynamics of inorganic compounds from combustion gases

A. Sharma and E. Ruckenstein — 675 — Dynamics and lifetimes of thin evaporating liquid films: some non-linear effects

A. Silberberg — 693 — The thermodynamic state of fluid systems in stationary velocity fields

S. Weinbaum, R. Pfeffer and Shu Chien — 705 — The search for the large endothelial pore and its possible link to the localization of atherogenesis

Xiao-Lin Chu and M. G. Velarde — 727 — Sustained transverse and longitudinal waves at the open surface of a liquid
